

FEATURES

- ◆ **UL Listed**
- ◆ **Made from Durable PVC**
- ◆ **Plumb, Plug & Play Design**
- ◆ **Low Power Consumption**
- ◆ **Low Maintenance**
- ◆ **No Moving Parts**
- ◆ **Low Profile in Pond**
- ◆ **1 Year Limited Warranty**
- ◆ **Easy Connect Cables**
- ◆ **Functions in Rough Waters**

Get Peace of Mind!

No other filling system is able to function properly in rough waters like the LCS-0901 does with its patent pending sensing process. Our process took years of design engineering to overcome the problems associated with moving water in ponds. Other systems cost more and require the sensor be mounted in a calm area. Not the LCS-0901!

For further information visit us on the web at www.aquilitysystems.com, contact your local distributor or call (352) 332-1549.

Also Available

- FV-1034CM ¾" Valve Module – Increases fill volume for larger ponds.
- MNT-P Promount – Provides sensor mounting without spillway for plumbed systems.
- MNT-B Bankmount - Provides mounting for liner style ponds.

AUTOMATIC WATER LEVELING SYSTEMS

Introducing The LCS-0901

Automatic Water Leveling System

Peace of Mind for Your Pond

Your pond demands the Best!

Level Waters introduces a truly innovative product that finally offers you peace of mind from leaks, evaporation and undependable float switches. The first truly integrated electronic pond filling system, the LCS-0901 automatically senses the level in the pond and fills it eliminating low water level conditions that can be harmful to pumps and prized fish.

PLUMB, PLUG & PLAY

LC-901 Controller

SPW-701
Spillway

FV-701 Fill Module

Simple to Install

Modular design allows anyone to install the system. *Plumb, Plug & Play* is the method we use to describe how easy installation of the LCS-0901 system is. Simply mount the controller, fill module, spillway and sensor, and then connect with cables. That is it!

Simple plumbing is needed to run water from the fill module to the pond and instructions are provided in the user manual. Both the **LCS-0901** controller and fill module mount with simple slip-mount holes and the spillway mounts to many preformed ponds with a clamp mount or can be mounted directly with two screws.

Almost No Maintenance

Other than periodically brushing out the sensor window and changing the alarm battery, the LCS-0901 requires absolutely no maintenance, unlike float switches!

Float switches are cheap. However, they clog and become undependable over time. The floats are notorious for filling with water and causing an overflow condition. The WLS-901 Sensor has no moving parts that can become fouled and will not fill with water.

THE FUTURE OF POND FILLING

Level Waters™ automated pond filling devices are poised to become the industry standard for worry-free filling systems.

With our 1-Year Limited Warranty and an MSRP of just \$389.98, you get peace of mind at a reasonable cost.

The LCS-0901 UL Listed system includes the following:

- ◆ 1 LC-901 Controller
- ◆ 1 FV-701 Fill Module
- ◆ 1 SPW-701 Spillway w/sensor mount
- ◆ 1 WLS-901 Single-plane Sensor
- ◆ 1 WC-1 15' Control Cable
- ◆ 1 WC-2 25' Sensor Interface Cable
- ◆ 1 AC Power Transformer
- ◆ 1 Installation Accessory Kit
- ◆ 1 User Manual
